

KANIS FATHIMA SHAIK

Junior SAP Analyst

+91 8688550848

fathima14shaik@gmail.com

Bengaluru, India

Professional Summary

Results-driven IT professional with hands-on experience in SAP MM and Frontend Development, supported by a strong understanding of business processes and modern web technologies. Experienced in SAP Procure-to-Pay (P2P), inventory management, master data maintenance, and AMS support across QXS and PRD environments. Contributed to enterprise projects involving plant implementation, procurement, and process optimization. Skilled in developing responsive and user-friendly web applications using HTML5, CSS3, Bootstrap, Tailwind CSS, and React.js. Proficient in Git and GitHub for version control and collaborative development. Strong analytical, problem-solving, and documentation skills with the ability to work effectively in cross-functional teams. Quick to learn new technologies and adapt to dynamic project environments. Committed to delivering high-quality solutions while continuously improving technical and professional expertise.

Skills

- **Functional:** SAP MM, Procure-to-Pay (P2P), Inventory Management, Purchase Orders (PO), Goods Receipt (GR), Material Master, Pricing & PIR, Plant Management.
- **Testing:** Functional Testing, Regression Testing, End-to-End P2P Testing, Cross-Module Testing, UAT / CCB Testing.
- **Tools & Systems:** SAP QXS, SAP PRD, SAP QXS Clone.
- **Support & Methods:** AMS Support, Agile / Scrum, RPA Exposure, Documentation.
- **Frontend Skills:** HTML5, CSS3, Responsive Web Design, Bootstrap, Tailwind CSS, React.js, Git, GitHub.

Professional Experience

Associate Software Engineer | MicroInfoWeb Pvt Ltd | (05/2026 – Present)

Roles & Responsibilities:

- Developed responsive and user-friendly web interfaces using **HTML5, CSS3, Bootstrap, and Tailwind CSS**.
- Built reusable and modular UI components using **React.js**, improving code maintainability and scalability.
- Translated UI/UX designs into clean, pixel-perfect, and responsive web pages.
- Implemented responsive web design techniques to ensure seamless user experiences across desktops, tablets, and mobile devices.
- Optimized website performance by writing clean, efficient, and well-structured frontend code.
- Integrated frontend components with backend APIs to display dynamic and interactive content.
- Managed source code using **Git** and **GitHub**, following version control best practices and collaborating effectively within development teams.
- Followed modern frontend development standards, ensuring code readability, reusability, and consistent design implementation.

Junior SAP Analyst | OTM Labs Ind Pvt Ltd | (08/2024 – 06/2025)

Roles & Responsibilities:

- Replicated Purchase Orders in the QXS environment by referencing PRD system data, as instructed by senior team members.
- The QXS Clone platform was newly introduced to our team, and I was responsible for testing its functionality to ensure it works properly throughout the entire P2P (Procure-to-Pay) cycle.

- Additionally involved in an RPA project, where we replicated Purchase Orders by referencing data from the PRD system and recreated them in the QXS environment, including processing over 30 Goods Receipt (GR) postings within a single PO along with associated delivery notes.
- Re-executed VERTEX Project test cases from a previous project for validation and data consistency as per business requirements.
- Re-executed the Cross-Module OTC BPML Regression Suite test scripts to validate the integration and functionality across various modules, ensuring comprehensive coverage and stability.
- We have developed a comprehensive test script and incorporated relevant test data for our project, New Plant for MT, which involves establishing a new SAP manufacturing plant for MT business operations in the Houston area. This initiative encompasses key functions including production planning, inventory management, and order processing.
- Handled AMS tickets, including configuration tasks such as assigning purchasing group 53J and updating material master data using T-Code MM02 (Change Material).
- Updated plant information for Inactive plants by adding "/9" to the plant address description to clearly indicate inactive status in the system.
- Participated in CCB (Change Control Board) testing activities, including test execution and scripting for approved changes.
- Modified and executed custom transaction ZMM_PIR_UPDATE, later renamed ZMM_PIR_POUPDATE, to update upcoming pricing information. Performed tests in multiple environments including test run and without test run scenarios.
- Involved in Regression Suite Testing, including creating and executing test scripts to ensure functionality stability across updates.
- Testing Involved in QXS, PRD by-weekly CCB and daily Scrums to discuss the progress.

Projects

Project 1: VERTEX

Project Description:

I worked on the VERTEX Project from the SAP MM side, where I executed end-to-end test cases to ensure all business processes were functioning correctly. I validated procurement, inventory management, and invoice verification scenarios integrated with the VERTEX tax engine. I also identified and documented defects, coordinated with functional and technical teams for resolution, and maintained test cases and execution results in the project repository while supporting UAT activities to ensure smooth system performance.

Roles & Responsibilities:

- Executed comprehensive end-to-end test cases from the SAP MM module to validate business processes and system functionality across the VERTEX project.
- Performed functional testing for procurement, purchasing, inventory management, and invoice verification scenarios to ensure alignment with business requirements.
- Reviewed and re-executed existing test cases to verify system stability after configuration changes, enhancements, and fixes.
- Identified, analyzed, and documented defects and inconsistencies, coordinating with technical and functional teams for timely resolution.
- Ensured tax determination and integration accuracy between SAP MM and the VERTEX tax engine during procurement and invoicing processes.
- Maintained and updated test case documentation and execution results in the centralized project repository for audit and tracking purposes.
- Actively participated in UAT (User Acceptance Testing) support by validating real-time business scenarios and providing functional insights.
- Followed SAP best practices and project standards to ensure quality, compliance, and smooth system performance throughout the testing lifecycle.

Project 2: NEW Plant for MT

Project Description:

I worked on the "New Plant for MT" project, which involved setting up and enabling a new manufacturing plant in the Houston

area. From the SAP MM side, I supported the creation and configuration of a new plant and ensured it was functioning correctly across all business processes. I performed end-to-end testing in QXS and PRD environments to validate integration with production planning, inventory management, and order processing. I also prepared complete MM-side documentation to ensure smooth implementation, process clarity, and operational readiness of the new plant.

Roles & Responsibilities:

- Supported the setup and configuration of a new plant in SAP for a manufacturing unit in the Houston area.
- Verified that the newly created plant was working correctly across all MM-related business processes.
- Tested procurement, inventory management, and order processing scenarios to ensure seamless plant operations.
- Coordinated with Production Planning (PP) processes to validate material flow and plant integration.
- Executed end-to-end functional testing in QXS and PRD environments to confirm system stability and accuracy.
- Ensured proper plant-level master data validation, including materials, purchasing, and storage locations.
- Created and maintained detailed functional documentation from the SAP MM side for the new plant setup.
- Supported business users during testing phases and ensured the plant was production-ready with minimal issues.

Education

- Bachelor of Technology in Artificial Intelligence and Machine Learning Engineering **Pace Institute of Technology and Sciences, Andhra Pradesh, India (2020 to 2024).**
